

RIVER SHUTTLES
2020 HEALTH AND SAFETY GUIDELINES AND PROCEDURES FOR COVID-19

- When entering and exiting a client's vehicle, all surfaces around the driver's compartment will be disinfected.
- Disinfecting includes wiping down of any surface that the driver is required to touch in order to operate the vehicle safely, which includes but may not be limited to the steering wheel, door handles and gear shifting components.
- If the driver comes in contact with surfaces that have not been disinfected, hands will be sanitized immediately.
- When fueling vehicles, pump handles will be disinfected prior to contact, or hands will be sanitized immediately after coming in contact with the pump handle.
- River Shuttles agrees to provide all necessary supplies for safe operation of procedures which will include mask, gloves, sanitizing wipes, hand sanitizer and disinfectant aerosol spray.
- Masks are required when riding in company vans with other employees.
